

1,000 builders. 3 countries. *1 weekend.*

HackEurope is a non-profit, student-run hackathon and the community around it. Our mission is to help Europe’s best young talent build companies and careers here.

In February 2026, 1,000 students picked on what they’d built hacked for 30 hours across Dublin, Paris and Stockholm at once. We’re back in February 2027.

HackEurope 2026 in numbers

4,511	200	26%
students signed up for 1,000 places	universities, led by Imperial, Trinity, UCL, TUM and KTH	had already won or placed at a hackathon

Some of our 2026 partners

ANTHROPIC	Google DeepMind	stripe	miro
ElevenLabs	Hugging Face	monzo	intercom

New for 2027: we’re going all in on hardware. More of the room will be building with robotics, hardware and ML than ever before. It’s the year to meet Europe’s next robotics engineers early, and be the name they know when they start looking for roles.

Let's build hackeurope
2027 together.
